A

Abbott, U. K. and P. Sengel, *In Vitro* Studies with the Scaleless Mutant: Interactions During Feather and Scale Differentiation, 255.
Abplanalp, Hans, *et al.*, Micromelia in Japanese Quail: An Embryonic Lethal Mutant, 188.
Accessory Chromosomes in *Miscanthus floridulus*, Sam Price, 13.
Acid Soluble Phosphorus in Brains of Neurological Mice, Chai H. Yoon and David J. Denuccio, 202.
Albinism and Diet Choice in the Ring Neck Dove, Clyde E. Keeler, 289.
Alexander, D. E. and J. B. Beckett, Spontaneous Triploidy and Tetraploidy in Maize, 103.
Allododecaploid Hybrid of *Hibiscus diversifolius* and Some Related F_1 Hybrids, Margaret Y. Menzel and F. D. Wilson, 55.
Androgenesis—Its Use for Transfer of Maize Cytoplasm, Sherret S. Chase, 152.

Animal Genetics:

Bees: pink eye-color and viability, 163; gynandromorph production by egg chilling, 195.
Cats: variability of taillessness, 167; *Journal of Cat Genetics*, 218; independent assortment of Manx and three color coat mutants, 266.
Cattle: hairless Guernsey, 3; double cervix, 112; genetic hypotrichosis, 186.
Dog: chromosomes of beagle, 273.
Dove, albinism and diet, 289.
Enzyme, isolated, 44.
Fowl: effect of blood transfusions on plumage color in chickens, 17; mitotic and meiotic chromosomes of the duck, 91; turkey-chicken hybrids, 101; sex-influenced congenital leg anomaly in chickens, 116; micromelic quail, 188; *in vitro* studies with scaleless mutant chickens, 255.
Goats, polledness and infertility, 237.
Grasshopper, translocation heterozygote, 62.
Hamster, color mosaics, 31.
Mammals, behavior re-examined, 170.
Mice: tanoid—new agouti mutant, 26; anophthalmic mutant, 39, 79; slate color mutant, 47; electrophoretic mobility and solubility of hemoglobins, 107; linkage of transferrin locus, 127; reproductive system of adipose, 135; genetic nomenclature, 159; locomotor activity and oxygen consumption, 177; acid soluble phosphorus in brains of neurological, 202; linkage group XVIII, 245; whirler, recessive behavior mutation, 263; strain differences on high salt diet, 297.
Penetrance, expressivity and thresholds, 143.
Rats, polygenic inheritance of leucocyte count, 132.
Tribolium confusum, "blistering", 183.

Anophthalmic Mutant of the Mouse: I. Genetic Contribution to the Anophthalmic Phenotype. Sidney L. Beck, 39; II. An Association of Anophthalmia and Polydactyly, Sidney L. Beck, 79.
Ayalon, N., *et al.*, Polledness and Infertility in Male Saanen Goats, 237.

B

Barnea, R., *et al.*, Polledness and Infertility in Male Saanen Goats, 237.
Batt, R. A. L. and G. Ainsworth Harrison, The Reproductive System of the Adipose Mouse, 135.
Beck, Sidney L., The Anophthalmic Mutant of the Mouse: I. Genetic Contribution to the Anophthalmic Phenotype, 39; II. An Association of Anophthalmia and Polydactyly, 79.
Becker, R. B., *et al.*, Hairless Guernsey Cattle: Hypotrichosis—A Non-lethal Character, 3.
Beckett, J. B. and D. E. Alexander, Spontaneous Triploidy and Tetraploidy in Maize, 103.
Bedi, T. S., *et al.*, A Translocation Heterozygote in *Chrotogonus trachypterus*, 62.
Bemis, W. P., Interspecific Hybridization in *Cucurbita*: II. *C. moschata* Poir × Xerophytic Species of *Cucurbita*, 285.
Biparental Determination of Nut Characters in *Castanea*, Richard A. Jaynes, 84.
"Blistering" in *Tribolium confusum*, Daniel J. McDonald, *et al.*, 183.
Books Received, 166.

Books Reviewed:

Hayes, Herbert K., A Professor's Story of Hybrid Corn, 205.
Lenz, Widukind, Medical Genetics, 95.
National Academy of Sciences—National Research Council, Mutation and Plant Breeding, 60.

Botanical Congress, Tenth (X) International—Edinburgh, 1964, 138.
Broadhurst, P. L. and J. L. Jinks, The Inheritance of Mammalian Behavior Re-examined, 170.
Burk, L. G. and J. J. Grosso, Plasmagenes in Variegated Tobacco, 23.

C

Cale, Gladstone H., *et al.*, Pink—An Eye-Color and Viability Gene in Honey Bees, 163.
Carlile, William R., *et al.*, Pink—An Eye-Color and Viability Gene in Honey Bees, 163.
Carson, J. R., *et al.*, Effect of Blood Transfusions on Plumage Color in Chickens, 17.
Cattle, see *Animal Genetics*.
Character is a Character is a Character, (Excerpt), 38.

Chase, Herman B. and Louis J. Pierro, Slate—A New Coat Color Mutant in the Mouse, 47.
Chase, Sherret S., Androgenesis—Its Use for Transfer of Maize Cytoplasm, 152.
Chen, C. H. and J. G. Ross, Colchicine-Induced Somatic Chromosome Reduction in Sorghum. I. Induction of Diploid Plants from Tetraploid Seedlings, 96.
Chiasson, L. P., Gene Frequencies of the Micmac Indians: Blood Groups and Other Inherited Characters, 229.
Chickens, see *Animal Genetics*, Fowl.
Chromosomes of the Beagle Dog, W. Moore, Jr. and P. D. Lambert, 273.
Cipar, Martin S., Model System for Demonstration of *S* Allele Action, 303.
Coffman, Franklin A., Two New Aberrants in Eaton Oats: "Bridging Type" and "Frustrated", 248.
Colchicine-Induced Somatic Chromosome Reduction in Sorghum. I. Induction of Diploid Plants from Tetraploid Seedlings, C. H. Chen and J. G. Ross, 96; II. Induction of Plants Homozygous for Structural Chromosome Markers Originally Heterozygous in Two Pairs, G. M. Simantel, *et al.*, 221; III. Induction of Plants Homozygous for Structural Chromosome Markers in Four Pairs, G. M. Simantel and J. G. Ross, 277.
Color Mosaics in Syrian Hamsters, Roy Robinson, 31.
Committee on Standardized Genetic Nomenclature for Mice, A Revision of the Standardized Genetic Nomenclature for Mice, 159.
Common Fasciation in Douglas Fir, J. W. Duffield and J. G. Wheat, 240.
Cope, Will A., Inheritance of Two Dwarf Characters in Sericea Lespedeza, 76.
Corrigendum, Some Fertile Hybrids of Bunch and Muscadine Grapes, Robert T. Dunstan, 25.
Crippled Plymouth Rock Chickens: A Sex-Influenced Congenital Leg Anomaly, Walter Morgan, 116.

D

Denuccio, David J. and Chai H. Yoon, Acid-Soluble Phosphorus in Brains of Neurological Mice, 202.
Dill, R. E. and Wallace McNutt, Strain Differences in Mice on a High Salt Diet: Some Genetic and Physiological Comparisons Between Two Strains, 297.
Dodson, Edward O., A Reply to the Lamarckians, 29.
Downs, William G., Jr. and David F. Fitzpatrick, Polygenic Inheritance of Leucocyte Count in Rats, 132.
Drescher, W. and W. C. Rothenbuhler, Gynandromorph Production by Egg Chilling: Cytological Mechanisms in Honey Bees, 195.
Duck, see *Animal Genetics*, Fowl.
Duffield, J. W. and J. G. Wheat, A Common Fasciation in Douglas Fir, 240.

E

Effect of Blood Transfusions on Plumage Color in Chickens, P. C. Lowe, *et al.*, 17.
Examples of Reversion to Dominant Phenotypes in Tomatoes, P. A. Young, 276.

F

Female-Sterile Mutation in a Doubled Haploid of Upland Cotton, Norman Justus and James R. Meyer, 65.
Fitzpatrick, David F. and William G. Downs, Jr., Polygenic Inheritance of Leucocyte Count in Rats, 132.
Flowering and Earliness in the Tomato: Inheritance of Associated Characteristics, Shigemi Honma, *et al.*, 212.
Foster, R. E., Glabrous, A New Seedling Marker in Muskmelon, 113.
Four Goiters in a Family of Seven, 83.

G

Gene Frequencies of the Micmac Indians: Blood Groups and Other Inherited Characters, L. P. Chiasson, 229.
Genetic Studies of Earworm Resistance in Maize: Utilizing a Series of Chromosome-Nine Translocations, Donald S. Robertson and E. V. Walter, 267.
Glabrous, A New Seedling Marker in Muskmelon, R. E. Foster, 113.
Gowen, John W., *et al.*, Pink—An Eye-Color and Viability Gene in Honey Bees, 163.
Grant, William F., Mutation and Plant Breeding, (Rev.), 60.
Green, Margaret C., *et al.*, Linkage Group XVIII of the Mouse, 245.
Groff, David and M. L. Odland, Inheritance of Closed-Flower in the Cucumber, 191.
Grosso, J. J. and L. G. Burk, Plasmagenes in Variegated Tobacco, 23.
Gynandromorph Production by Egg Chilling: Cytological Mechanisms in Honey Bees, W. Drescher and W. C. Rothenbuhler, 195.

H

Haensel, H. D., *et al.*, Colchicine-Induced Somatic Chromosome Reduction in Sorghum: II. Induction of Plants Homozygous for Structural Chromosome Markers Originally Heterozygous in Two Pairs, 221.
Hairless Guernsey Cattle: Hypotrichosis—A Non-lethal Character, R. B. Becker, *et al.*, 3.
Hammons, Ray O., White Testa Inheritance in the Peanut, 139.
Handbook of Hybrid Corn, (Rev.), W. Ralph Singleton, 205.
Harrison, G. Ainsworth and R. A. L. Batt, The Reproductive System of the Adipose Mouse, 135.
Haynes, F. L., Jr., Meiotic Abnormalities in *Solanum berthaultii*, 8.
Hemoglobins in Mice: Segregation of Genetic Factors Affecting Electrophoretic Mobility and Solubility, H. Glenn Wolfe, *et al.*, 107.

Hill, W. G., *et al.*, Micromelia in Japanese Quail: An Embryonic Lethal Mutant, 188.
Ho, Ti, The Nucleolar Chromosomes of the Maiden-Hair Tree, 67.
Honma, Shigemi, *et al.*, Flowering and Earliness in the Tomato: Inheritance of Associated Characteristics, 212.
Howell, Joyce M. and P. B. Siegel, Phenotypic Variability of Taillessness in Manx Cats, 167.
Huang, C. C., *et al.*, Colchicine-Induced Somatic Chromosome Reduction in Sorghum: II. Induction of Plants Homozygous for Structural Chromosome Markers Originally Heterozygous in Two Pairs, 221.

Human Genetics:

Foot, relative digit size, 35.
Goiter, four in family of seven, 83.
Karyotype, normal, 158.
Lamarckians, reply to, 29.
Mimac Indians, gene frequencies of blood groups, other characters, 229.
Syndactyly and clinodactyly within an Indian kindred, 219.

Hutt, F. B.: Note on Six Kinds of Genetic Hypotrichosis in Cattle, 186; *The Journal of Cat Genetics*, 218.
Hybrid Tomato Resistant to Tobacco Mosaic Virus: Inheritance for Resistance in Derivatives of a Complex Species Hybrid, R. K. Soost, 241.

I

Iizuka, Muneo and Jules Janick, Induced Tetraploidy in Philodendron, 37.
Independent Assortment of Manx and Three Coat Color Mutants in the Domestic Cat, Neil B. Todd, 266.
Induced Tetraploidy in Philodendron, Muneo Iizuka and Jules Janick, 37.
Inheritance of Closed-Flower in the Cucumber, David Groff and M. L. Odland, 191.
Inheritance of Mammalian Behavior Re-examined, P. L. Broadhurst and J. L. Jinks, 170.
Inheritance of Relative Digit Size in the Human Foot, Arnold R. Kaplan, 35.
Inheritance of Two Dwarf Characters in Sericea Lespedeza, Will A. Cope, 76.
Interspecific Hybridization in *Cucurbita*: II. *C. moschata* Poir × Xerophytic Species of *Cucurbita*, W. P. Bemis, 285.
In Vitro Studies with the Scaleless Mutant: Interaction During Feather and Scale Differentiation, P. Sengel and U. K. Abbott, 255.
